

# Documentum REST Services

Version 45

created by Katie Masters on Jan 20, 2014 12:53 PM, last modified by William Zhou on Jul 20, 2017 6:33 AM

[alternate https://community.emc.com/go/DocumentumREST](https://community.emc.com/go/DocumentumREST)
[latest-version 7.3 \(bedrock\)](#)

Documentum REST Services is a set of RESTful web services to interact with the Documentum platform. It is hypertext-driven, server-side stateless, and content negotiable, which provides you with high efficiency, simplicity, and makes all services easy to consume.
